

**Verse 1:**

And I know that you've been hurting  
But I don't think your mind's working  
'Cause I don't see why we have to do this  
Since all I wanted is, one more kiss  
Is there anything that you can hate,  
about us and what you called our fate  
When you said goodbye (said goodbye)  
I made you walk right out of my life

**Interlude:**

Oooh...

**Verse 2:**

Do you know what pain is like?  
Seems like you can give it with a knife  
The distance or time aren't to blame  
You can't say that I lost the flame  
Don't take my love for granted  
Even if you were my enchanted  
Do you feel anything inside your heart  
as you tear my world apart?

**Chorus:**

I won't let you lie to me anymore!  
I won't let you lie to me anymore!

**Verse 3:**

I can't believe that you'd blame me  
Did I not make you happy  
And you said that our love would never end  
What did I do to even prove  
That I am no longer your rock  
Can we please sit and talk again

**Chorus:**

I won't let you lie to me anymore!  
I won't let you lie to me anymore!

**Bridge B:**

*<insert rap here>*

**Chorus:**

I won't let you lie to me anymore!  
I won't let you lie to me anymore!
